SPRT
Specialized, Pioneer, Revolution, Technology

SP-POS890PLUS

SPRT 80MM POS PRINTERS

Features :

- New look, classic design
- Support out of paper alarm, paper near end detection
- Humanized design, automatic paper cutting
- Support 58MM/80MM paper width
- Mutiple interfaces - USB, Serial, LAN, and Bluetooth

Application Scenarios :

- Wholesale
- Supermarkets
- Retail
- Traffic police
- Catering
- Medical care

Advantages:

Two-color contrast, important information is more obvious

More recognizable, more eye-catching, more practical

Two-color printing in one step

High efficiency, easy operation, less consumables, ready to use

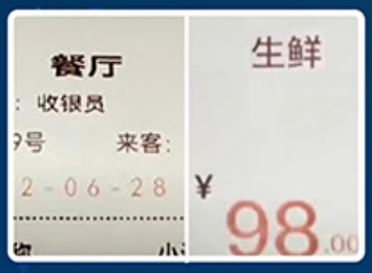

More flexible application of printing color

Meet the online printing requirements of various single-sided two-color printing

Two-color printing, economical and environmentally friendly

The color-changing thermal material has been localized

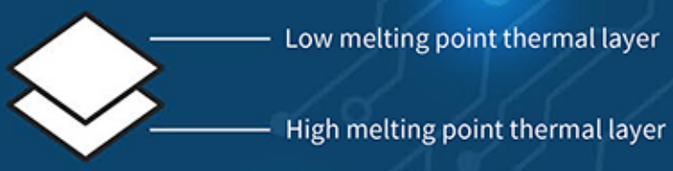

Be used in many occasions

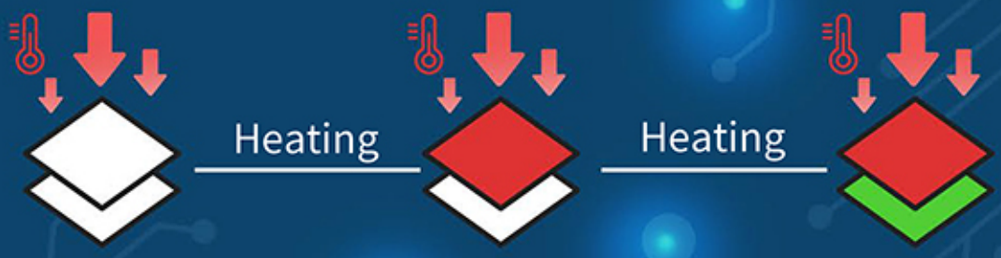

It is convenient for users to identify important items and important events (only for receipt printing)

Technical background:

Two-color thermal printing is mainly to make two-color thermal paper by coating two thermal layers on thermal paper, so that it can produce two colors after thermal development.

For example, the low melting point layer is red,
the high melting point layer is green, then the thermal paper is black.
